

SunSafe Project

Curriculum: Preschool

Learning Objectives

The children will:

1. Become more aware of the sun and the importance of sun protection.
2. Learn ways to reduce their sun exposure.

Curriculum Overview

We suggest that you schedule two SunSafe Theme Days (**SunDays**) followed by weekly reminder activities, chosen from among the **Support and Additional Activities**. Activities for the SunDays can be incorporated into the regular daily schedule. The reminder activities as well should be incorporated into appropriate time slots in the children's day. Support Activities are categorized by type of activity (music, art, etc.) to assist you in planning.

Our suggestions are guidelines only, feel free to use your own ideas to adapt these activities or invent new ones!
